

#BeDiligent Internship Program

Software Engineer Intern

Position Overview

Spend your days making a difference, not just working for a living. We do that by creating Modern Governance and Security, Risk management, Compliance, and audit software that uncovers fraud, waste, environmental risk, and abuse in their organizations. Our collaborative R&D teams are distributed into several core Pillars like Boards Governance, Governance Operations or Risk and Compliance. We use different technologies to build our SaaS platform and tackle strategic business challenges, creating highly impactful solutions for today and for our future to support Modern Governance.

The ideal candidate is enthusiastic about technologies and has a strong desire to create something great. The candidate will have the opportunity to learn and practice effective analysis, design, programming, and testing to produce and maintain scaled SaaS software solutions. The successful candidate will work as part of an established team used to working together to achieve excellent results. Our ideal candidate will be someone who is motivated, proactive and takes pride in their code.

Key Responsibilities

- Work as part of an agile team and contribute to grooming user stories and ensuring work items are clear and testable
- Develop and maintain an existing codebase
- Take part in team's ceremonies
- Work on the team's backlog including planning, implementation, testing and release

Required Experience/Skills

- Active student at Hungarian University
- Ongoing studies on relevant Product Development field
- Self-driven mindset
- Fluent English
- Strong analytical skills
- University-level programming coursework or comparable coding boot camp qualification
- Looking for education in programming and Product Development
- Ability to follow instructions
- Ability to work unsupervised for extended periods

We Take Care Of Our Team

- Continuous learning opportunities
- Flexible work arrangements
- Diversity & engagement programs, company events
- An outstanding new facility with a first class location and amenities in Budapest city center. (Szervita square)
- at the end of the program, the best trainees will get a job offer
